

I am outraged to learn that a group from Broadcast radio and television could lobby against the freedom of speech (in the form of XM Radio). I listen to XM Radio to get news, weather, and music entertainment. XM Radio provides the variety and quality of listening that is NOT available to me in rural Utah. I work in the oilfields in Central Utah, and FM and AM radio stations simply do not cover into the canyons and valleys where I work. I URGE YOU, The FCC, to REJECT NAB's petition 04-160.

Sincerely,

Ron Winn
Roosevelt, Utah
